

**The Cleveland Astronomical Society**  
**Thursday, April 3, 2003 Meeting Announcement**

6:15 – 7:00 p.m., Snacks and Soft Drinks; 7:00, dinner.

7:50: Announcements and Talk

**CanalWay Center, Cleveland MetroParks, Off E. 49<sup>th</sup> Street, Cuyahoga Heights**  
**(Drive Down Road to Center about ½ Mile Into Valley)**

**Speaker: Dr. Geoffrey A. Landis**

Senior Research Scientist, Ohio Aerospace Institute

On permanent assignment to the NASA Glenn Research Center

**“Mars Exploration Rovers 2003 and Future Mars Missions”**

Dr. Landis has spoken to the CAS twice before, keeping us informed about results of past Mars missions. Like his solar experiment on the Mars Pathfinder mission and other projects, Landis has developed experiments for the 2003-04 Mars mission, one that will measure solar energy and another that will determine the dust deposited on instruments. Come learn and about these experiments and the larger topic of Mars exploration.
