Thursday, Nov 5, 2009 Meeting Announcement

6:15—7:00 p.m. – Get acquainted and snacks

7:45—8:00 p.m. – Short Business Meeting

7:00—7:45 p.m. – Buffet Dinner (Reservations Required)

8:00—9:00 p.m. – Featured Speaker (Free to public)

Leonard Krieger CanalWay Center

4524 East 49th Street (turn onto Whittlesey Way to reach Center), Cuyahoga Heights (216-206-1000)

Speaker: Dr. J.D. Smith

Professor of Physics & Astronomy, University of Toledo

A Separate Light: New Views of Galaxies, Near and Far

Understanding the 13 billion year long evolution of the Universe -- from its fiery and formless origins to the fantastical and complex structures of the present day -- hinges on our ability to see galaxies in completely new ways. I will highlight astronomer's rapid recent progress in shedding new light on the processes which control how galaxies form and evolve, with an emphasis on the tremendous power that infrared space astronomy brings to this problem.

High School Teachers interested in bringing two students, as our guests, please contact Bob Sledz, President, at

440-333-7827 or sledzbob@yahoo.com
